Healthcare Seminar: The Big Bang II

16 April 2025 1 min read

The publication of the Medical Schemes Amendment Bill and its twin, the National Health Insurance Bill, present a fundamental change in the funding of access to health services for both patients/consumers and providers – both healthcare professionals and medical schemes. The changes presented by the Bills are intentionally sweeping and designed to change the way South Africans buy and receive healthcare services.

This seminar will address the changes presented by the Bills, how the Bills affect the healthcare sector and what they mean for those operating in the healthcare sector in South Africa. It's need-to-know stuff.
